# 1. Uvod

Na narednim stranama tehničke dokumentacije ću detaljno pisati o korišćenim programskim jezicima, funkcionalnosti sajta, o samom templejtu, korišćenim CSS fajlovima, organizacionoj šemi, mapi sajta, opisu funkcionalnosti sa priloženim slikama i na kraju o kodovima.

## 1.1 Korišćeni programski jezici

Programski jezici koji su korišćeni prilikom izrade ovog sajta su:

- HTML
- CSS
- JavaScript
- jQuery
- Ajax
- jQuery Plugin

Sajt je urađen u programu Brackets. Biblioteke JQuery su korišćene i one su sledeće:

-jQuery v3.2.1

## 1.2 Opis funkcionalnosti

Funkcionalnost po stranama.

Index strana sadrži interaktivnu navigaciju koja upotrebom CSS-a prikazuje zagrade pored linkova da bi se znalo na kom linku se trenutno nalazi kursor. Sadrži naslov koji je moguće promeniti u admin panelu. Prilikom prve posete sajtu postoji samo Log in link kao i link ka dokumentaciji. Nakon logovanja se dobija meni koji odgovara logovanom korisniku. U zavisnosti od korisnika će se menjati sadržaj menija.

Skills strana sadrži naslov u paralaksu kao i tri veštine koje su prezentovane u vidu ikonice sa kratkim tekstom. Ovo je moguće promeniti u admin panelu i moguće je povećati ili smanjiti broj istih.

Work strana sadrži naslov u paralaksu pri vrhu strane i spisak radova koji se prezentuju čitaocu. Sve slike su povučene iz baze i mogu se menjati u admin panelu. Moguće je postaviti i više slika. Hoverom na neku od slika se pojavljuje overlaz koji sadrži link koji na klik otvara lightbox galeriju gde je moguće pogledati slike u prezentaciji.

About strana sadrži naslov u paralaksu kao i prethodne strane i nešto više o samom autoru rada. Na dnu strane se nalazi anketa koja pomoću Ajax-a upisuje podatke i automatski ih ispisuje nakon izvršenog glasanja.

Contact strana sadrži naslov u paralaksu takođe. Posедуje deo sa podacima o samom autoru koji se mogu menjati u admin panelu. Na dnu strane se nalazi kontakt forma koja je zaštićena regularnim izrazima na klijentskoj strani. Prilikom unosa netačnih podataka i pritiska na SEND dugme pojavljuje se mali oblačić u gornjem delu ekrana koji ispisuje grešku. Forma je funkcionalna i može se proslediti poruka na moju email adresu.

Login strana sadrži dve forme. Jednu za logovanje i jednu za unos novih korisnika. Za logovanje kao administrator potrebno je uneti administrator za username i isto to za password. Prilikom registracije novih korisnika oni su upisani u bazu i odmah se mogu logovati sa datim definisanim korisničkim imenom i šifrom.

Admin strana sadrži sva moguća podešavanja koja su moguća na sajtu. Od unosa, brisanja i editovanja korisnika do menjanja sadržaja na sajtu. Za svaku promenu je potrebno pritisnuti odgovarajuće submit dugme koje će izvršiti izmenu baze. Nakon toga je moguće proveriti promene odlaskom na stranicu na kojoj se nalazi izmenjeni sadržaj.

## 1.3 Template

Template nije korišćen iz drugih izvora nego je samostalno pisan za svaku stranicu posebno stoga ću to prikazati u sklopu koda zajedno sa slikama.

## 1.4 CSS

Eksterni CSS je korišćen za plugin Notify i Lightbox galeriju.

### 1.4.1 Notify

```

## 2.3 Funkcionalnost

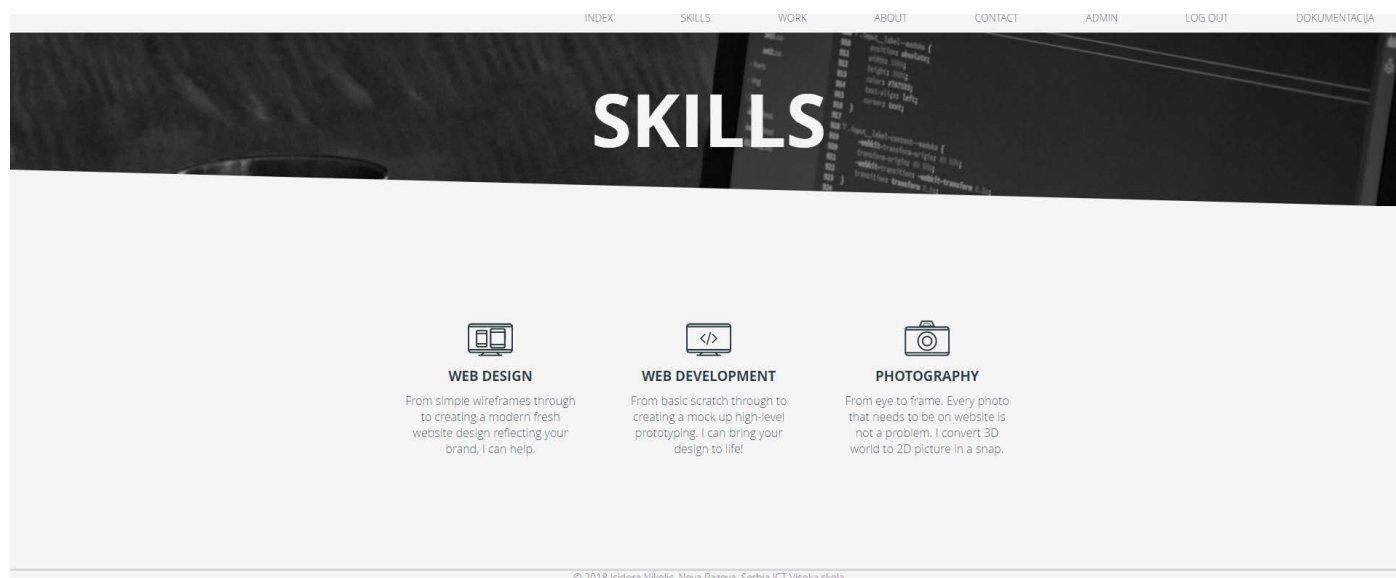

Na index stranici se nalazi link ka login stranici i link ka dokumentaciji u gornjem desnom uglu. Na sredini ekrana je ispisan tekst koji je moguće menjati u admin panelu.

The screenshot displays a web interface with a light gray background. At the top right, there are two links: "LOG IN" and "DOKUMENTACIJA". The main content area is divided into two sections. The first section, titled "Log in", contains two input fields labeled "Username" and "Password", followed by a "Log in" button. The second section, titled "Register", contains four input fields labeled "First Name", "Last Name", "Email", and "Username", followed by a "Password" field and a "Register" button. At the bottom of the page, there is a copyright notice: "© 2018 Isidora Nikolic, Nova Pazova, Serbia ICT Visoka skola". In the bottom right corner, there is a small logo and text: "Powered by 000webhost".

Na login stranici se nalaze dve forme. Prva je za logovanje a druga za registraciju novih korisnika. Za administratora sajta je potrebno uneti administrator za korisničko ime i administrator za šifru. Logovanje je moguće izvršiti odmah nakon registracije. Forma za registraciju je zaštićena i sa serverske i sa klijentske strane regularnim izrazima. Nije moguće uneti neispravne podatke u formu i tako registrovati novog korisnika. Svaki korisnik koji se registruje dobija ulogu user jer je administrator već rezervisano.

Nakon logovanja ulogovani korisnik se usmerava na index stranicu i u zavisnosti od uloge ispisuje se navigacioni meni koji sadrži ili ne sadrži određene linkove.

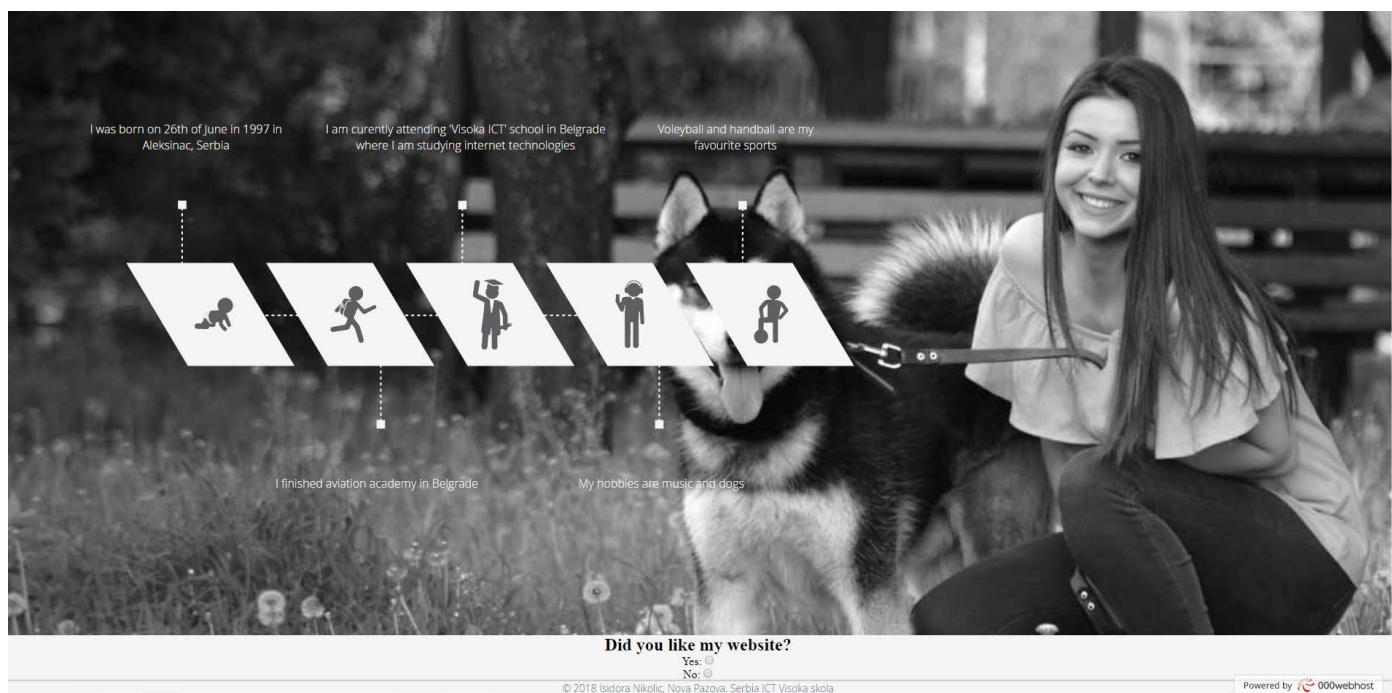

Na skills strani se nalazi paralaks sa naslovom i tri polja u kojima se nalazi opis veština. Ova tri polja je moguće menjati u admin panelu.

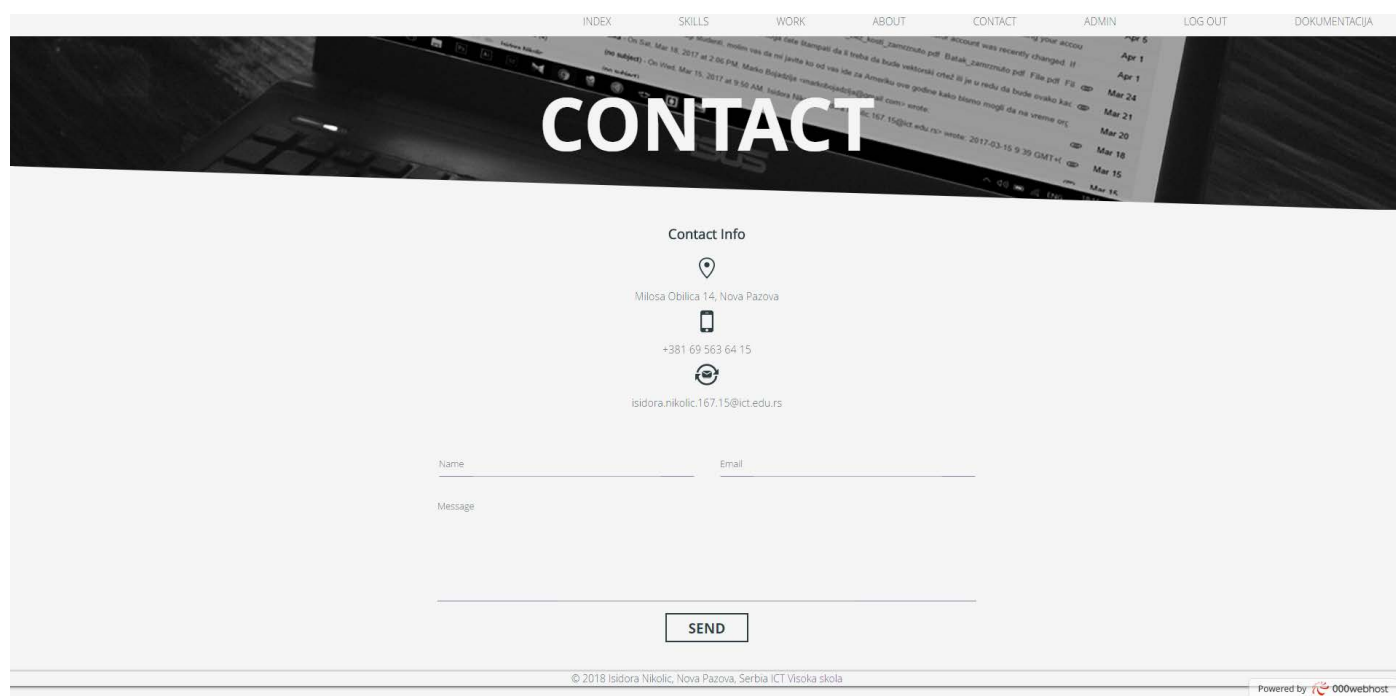

Na work stranici se nalazi galerija sa slikama iz baze. Prelaskom miša preko slike se pojavljuje div u kom postoji link "take a look" i pritiskom na koji se otvara lightbox galerija. Moguće je menjati slike na tastaturi. Sve slike je moguće promeniti u admin panelu, a takođe je moguće dodati ili obrisati slike.

Na about stranici se nalazi timeline koji sadrži podatke o meni kao i anketa u dnu strane koja omogućava glasanje pomoću Ajax-a.

Contact strana sadrži informacije o meni kao i formu koja omogućava slanje maila meni. Forma je u funkciji i moguće je stvarno proslediti poruku na moj email.

Admin strana sadrži tabele i forme koje omogućavaju unos, brisanje ili menjanje podataka na sajtu. Unosom u polja tražene vrednosti i pritiskom na odgovarajući submit je moguće promeniti podatke. Da bi se videli izmenjeni podaci potrebno je otići na stranicu na kojoj se desila promena.
